TIV Group 2008

A scatter plot on a grid with a central white region and black data points. The grid consists of a solid vertical line on the left and dashed horizontal and vertical lines. The white region is a central, vertically elongated shape with a narrow neck at the top and bottom, and wider, flared ends on the left and right. Black dots are scattered around this region. There are 12 dots in total: 4 on the left side, 4 on the right side, 2 above the top flared end, 2 below the bottom flared end, and 2 on the central vertical axis (one above and one below the top flared end).
