Package 'biotmleData'

October 14, 2018

Title Example experimental microarray data set for the `biotmle" R

package
Version 1.4.0
Description Microarray data (from the Illumina Ref-8 BeadChips platform) and phenotype-level data from an epidemiological investigation of benzene exposure, packaged using "SummarizedExperiemnt", for use as an example with the "biotmle" R package.
Depends R (>= 3.0)
Suggests Biobase, SummarizedExperiment
License file LICENSE
Encoding UTF-8
LazyData true
RoxygenNote 6.0.1
biocViews GeneExpression, DifferentialExpression, Sequencing, Microarray, RNASeq

git_branch RELEASE_3_7
git_last_commit 987381d
git_last_commit_date 2018-04-30
Date/Publication 2018-10-14
Author Nima Hejazi [aut, cre]
Maintainer Nima Hejazi <nhejazi@berkeley.edu></nhejazi@berkeley.edu>
R topics documented:
biomarkerTMLEout
Index

2 illuminaData

biomarkerTMLEout	Results obtained from running biomarkertmle on the "illuminaData" sample data

Description

Example results obtained from running the TMLE-based estimation procedure on the example data included with this package (illuminaData).

Usage

biomarkerTMLEout

Format

A biotmle object containing the results of running biomarkertmle.

These results are included here for the sake of making the vignettes build more quickly. The user will likely not benefit from using this data set.

Value

A biotmle object containing results from biomarkertmle.

illuminaData	Sample baseline covariates and Illumina microarray data from a 2007 study

Description

A dataset containing various baseline covariates and microarray expression measures from Illumina arrays used in a 2007 study.

Usage

illuminaData

Format

A SummarizedExperiment containing Illumina microarray data from the Ref-8 BeadChips platform in the "assay" slot and phenotype data on subjects in the "colData" slot:

This is example data to be used in testing the biomarkertmle procedure. Consult the vignettes for how to use this data.

Value

A SummarizedExperiment containing biomarkers and baseline covariates.

rnaseqTMLEout 3

rnaseqTMLEout	Results obtained from running biomarkertmle on simulated RNA-Seq data

Description

Example results obtained from running the TMLE-based estimation procedure on next-generation sequencing (count) data.

Usage

 ${\tt rnaseqTMLEout}$

Format

A biotmle object containing the results of running biomarkertmle.

These results are included here for the sake of making the vignettes build more quickly. The user will likely not benefit from using this data set.

Value

A biotmle object containing results from biomarkertmle.
